ONLINE SURVEY

BENEFITS

- Creation of an inventory of equipment on site
- Easy identification of equipment to be inspected on the floor plan using colored symbols
- Possibility of associating photos taken during the inspection with equipment or rooms
- Optimization of sending inventory data to preventive maintenance and CMMS systems
- Optimization of equipment inspection time
- Reduced errors or omissions in equipment inspection (color-coding separating complete and incomplete surveys)
- Employee sense of contribution to assist technical and fire safety inspection services

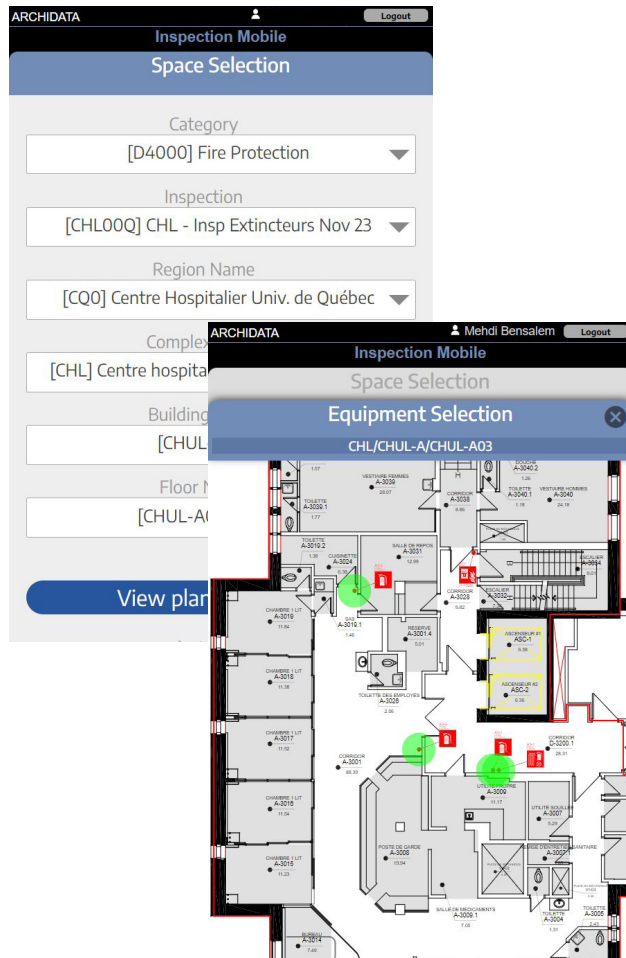

Management of Equipment on Site

Floor plans and equipment directly on a device, at any time and on the move!

The Archidata Mobile App is able to navigate ergonomically on the desired floor plan and allows building operations teams to create, consult and survey an inventory of various equipment with symbols directly visible on the plan.

Photos and questionnaires can also be associated to equipment for maintenance and inspection purposes. This allows for more regular and rapid updates and monitoring for the operating teams of the building.
